VENNU MANIKANTA PAVAN

B.Tech – CSE (AI & ML), CMR Institute of Technology, Hyderabad

7396870319 | manikantapavanv@gmail.com | linkedin.com/in/manikanta-pavan-vennu1906 | Hyderabad, India

PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) undergraduate with strong fundamentals in OOPs, DBMS, Operating Systems and Computer Networks, plus hands-on project experience across full-stack web development, machine learning and embedded systems. Proficient in Python; led an end-to-end research and development project as team leader. Flexible on location, shift timing and open to training across technology domains.

CORE TECHNICAL COMPETENCIES

Primary Language: Python (OOP, data structures, ML libraries); working proficiency in Java and C/C++

DSA & CS Fundamentals: Arrays, strings, stacks, queues, hashmaps, recursion; OOPs, DBMS (SQL, keys, normalization), OS (processes, scheduling, deadlocks), Computer Networks (TCP/UDP, HTTP/HTTPS)

Web / Full-Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, HTML/CSS/JavaScript

ML / AI: TensorFlow, Keras, Scikit-Learn, OpenCV, NumPy, Pandas

Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook

EDUCATION

B.Tech – CSE (AI & ML), CMR Institute of Technology, Hyderabad — 2022 – Present

Intermediate (MPC) – 85.4%, Sri Chaitanya Junior Kalashala — 2020 – 2022

SSC – 10.0 CGPA, Bhashyam High School — 2019 – 2020

PROFESSIONAL EXPERIENCE

AI Mentorship Internship – Technook — *Intern, Hyderabad* — May – Jun 2024

- Built and evaluated AI/ML models; implemented data preprocessing pipelines (cleaning, normalization, feature engineering) and assessed performance using accuracy, precision, recall and F1-score.

PROJECTS

Fullstack Crypto Marketplace — *React.js, Node.js, Express.js, MongoDB* — 2024

- Built a real-time crypto analytics platform — live price tracking via CoinGecko API, TradingView charting, and a RESTful API layer backed by MongoDB; can explain every endpoint and design choice in a live walkthrough.

Deepfake Detection — CNN-based System — *Team Leader; Python, TensorFlow/Keras, OpenCV* — 2025 – 2026

- Led full project lifecycle of a CNN-based deepfake detection system; based on a prior review of 112 papers where CNN architectures (XceptionNet, ResNet, VGG) averaged 89.73% accuracy and ensembles reached 99.65%. Can discuss model trade-offs and evaluation metrics in depth.

Human Following Robot — *Arduino Uno, Ultrasonic + IR Sensors, C/C++* — 2024

- Autonomous robot using sensor fusion for real-time human detection; movement logic programmed in C/C++ via an L293D motor driver, with full hardware circuit design.

CERTIFICATIONS

- AI Mentorship Internship – Technook • 7-Day ML Bootcamp – Google DSC × TensorFlow UG Hyderabad • Entrepreneurship Orientation Program

AVAILABILITY

Open to relocation, flexible shift timings, and training across multiple emerging technology domains.
